LUMICOAT

THE ULTIMATE UV PROTECTION

ELEVATE YOUR BRAND WITH ECO-FRIENDLY PROTECTIVE SOLUTIONS

LumiCoat is a groundbreaking UV filter that protects the integrity of color and fragrance while maintaining the crystal-clear transparency of glass. By merging advanced protection with sustainability, it aligns seamlessly with eco-conscious "clean beauty" standards.

PREMIUM UV PROTECTION, SUPERIOR PRESERVATION

LumiCoat blocks 86% of harmful UV rays, surpassing all similar coatings on the market. According to 24-hour sun tests, it prevents color fading and scent degradation for up to two years, significantly extending product shelf life while preserving integrity. LumiCoat absorbs 86% of harmful UV rays, 75% and 31% more than its direct competitors.

FLEXIBILITY AND VERSATILITY

LumiCoat empowers brands to choose packaging that reflects their unique identity and aesthetic vision. Its compatibility with diverse glass shapes and decoration techniques ensures that their design preferences are never compromised while delivering superior UV protection.

EFFECTIVE UV PROTECTION

Absorbs 86% of UV rays to protect your fragrances. 10.5% improvement in anti-UV ingredient scores.

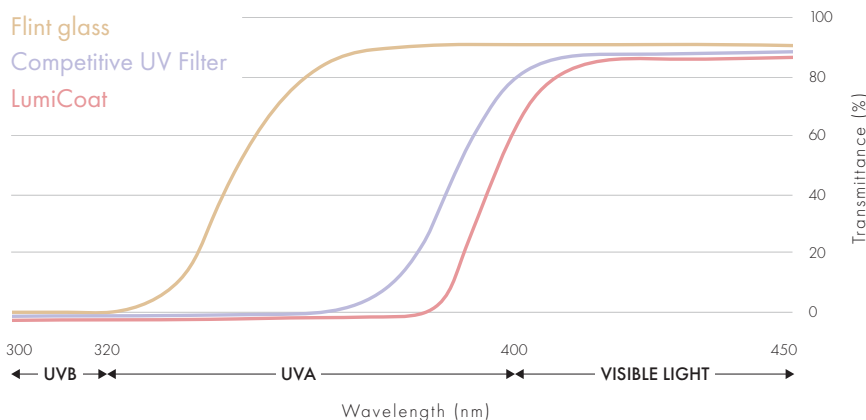

FULL TRANSPARENCY

Maintains crystal-clear glass aesthetics.

ECO-CONSCIOUS INNOVATION

Reduces reliance on traditional chemical stabilizers.

LumiCoat outperforms flint glass and the competitive UV filter by blocking both UVA and UVB rays up to 400 nm while still allowing visible light to pass through.
